bracketed." However, the substitute abstract filed on 3 January 2002 was intended to bring the pending Abstract in conformity with the original Abstract (undoing changes made in prior amendments). Nevertheless, this amendment includes, in Appendix A, a redlined version of the original abstract bracketing one deletion.

**APPENDIX A: REDLINED VERSION OF THE ORIGINAL ABSTRACT**

The invention is a ["VERI MAG PACK,"] a package that protects the magnetic stripe and PIN of a data card from unauthorized access from manufacture to the point of sale while allowing the retail sales clerk to have quick, easy access to the magnetic stripe at the time of sale. When the bottom perforated portion of the packet is removed, without destroying the integrity of the packet, the magnetic stripe is revealed to the sales person to swipe through a magnetic card reader to verify, activate, and register the card. The PIN remains inside the packet and not accessible to the sales person. Only the customer will see the PIN. The PIN and data card instructions are accessible when the perforated top and right sides of the packet are removed by the customer.
